Gabino Antuña Ortiz

Data, AI & Cloud | Hands-on experience | Problem Solving | Execution

I've spent years **building data platforms** and **leading projects** end to end. I like **solving problems** in a simple way, avoiding noise, and **focusing on what really matters.** I've led teams, managed budgets, and I still enjoy keeping my hands on the technical side. For me, the point is always: **make it work and make it useful.**

WHAT I OFFER

Data Platforms | End-to-End Design, Execution & Governance
- Design data platforms in cloud
- Data lake & warehouses organization
- Building ETL processes for different data sources
- Corporative reporting & self-consumption data for business profiles
- Data governance: powered by GenAI

Use Cases | Understanding, solution, execution. Feedback + Impact
- Data extraction from different sources (APIs, research, web scraping)
- Data cleaning, transformation, master data building
- Automation & processes improvement
- Reporting & Visualization

Teaching: Formations in Data & AI
- Data, BigData: Python, SQL and Databases organization
- GenAI: How to use LLMs (ChatGPT, Gemini, Grok) properly
- Data organization: How to work properly with spreadsheet data
- Cloud

Datasets & Data Products
- Curated datasets with direct business value
- Public data cleaned, structured, and delivered.
- Example 1: Energy, resources, electric infrastructure
- Example 2: Pieces of news, state bulletins & announcements, countries development measures…

HOW I WORK

Methodology
Problem understanding → Solution design → Execution → Impact → Feedback

Steps
- 1) Initial meeting to understand the problem
- 2) Solution proposal
- 3) Project development
- 4) Feedback & next steps
